GUHRING

Ratio®

Milling of high-tensile titanium alloys, stainless steels and special materials

Slotting and **roughing** even at great depths

Very smooth operation and optimal surface finish

RF 100 Ti Aircraft

GUHRING - YOUR WORLD-WIDE PARTNER

RF 100 Ti AIRCRAFT

High-performance end mill

for titanium and special alloys

ZENIT-coating
The RT 100 Ti Aircraft is also available with ZENIT coating. The coating impresses through even better glide characteristics and reduced adhesion.

Large face chip pockets and improved web thinning allow reliable plunging and orbital drilling.

RF 100 Ti Aircraft application

RF100 Ti Aircraft, Code no. 3498 12,020,
aviation structural component

Application:
Wet machining in TiAl6V4

Cutting parameters:
a_p: 24 mm a_e: up to 0.53 mm imachining®
v_c: 155 m/min S: 4125 min-1
f_z: up to 0.18mm v_f: up to 3100 mm/min

Metal removal rate Q = 36 cm³/min
Tool life in excess of 135 min for roughing!

Its toughness, chemical resistance and low thermal expansion makes titanium indispensable for heavily stressed components. At the same time these characteristics bring about enormous machining challenges Guhring's RF 100 Ti Aircraft was especially developed to satisfy these demands. Its new face and flute geometry as well as its transition angle enable the process reliable milling, slotting and roughing in special and titanium alloys. The optimised corner radius ensures long tool life.
